MEAD ACCOUNTABILITY ADVISORS LLC

Technical Accounting Advisory for Governments

Dean Michael Mead, CGFM | 914.497.3293 | dean@dmmead.com

New accounting standards shouldn't mean audit surprises. I help government finance teams implement GASB standards correctly — the first time.

With 24 years at the Governmental Accounting Standards Board, I bring unique, direct experience with and understanding of what GASB standards require and how to meet them efficiently. I help finance teams prepare with confidence, not scramble at audit time.

HOW I CAN HELP YOUR TEAM

GAAP Help Line — On-call access to deep GASB expertise for everything from routine accounting issues to complex or unusual transactions — leases, SBITAs, P3s, and more. Like having GASB on speed dial.

GASB Implementation Support — Step-by-step guidance on new standards from initial assessment through financial statement presentation. I have helped dozens of governments implement GASB Statements 103 and 104 and will be ready to assist with Statement 105 and forthcoming standards on infrastructure, going concern and severe financial stress, and revenue and expense recognition as soon as they are issued.

Audit Readiness Review — Pre-audit review of MD&A, financial statements, notes, and schedules to identify GASB compliance gaps before your auditors do.

Staff Training — Customized training for your finance team on accounting and reporting fundamentals, new standards, disclosure requirements, and best practices in government financial reporting.

ACFR Technical Review — Independent technical review of your annual comprehensive financial report before submission for GFOA Certificate of Achievement consideration.

WHY GOVERNMENT FINANCE TEAMS TRUST ME

- ✅ Almost 40 years of experience with GASB standards — direct, authoritative knowledge of their requirements and intent
- ✅ CGFM-certified — credentialed specifically in government financial management
- ✅ Experience across all types and sizes of governments
- ✅ Practical, implementation-focused approach — not just technical theory

---
